

I no longer listen to AM or FM in my car, with the advent of CD and XM radio. I am freed from the harangues of advertisers and self-imposed comedian DJ's when it comes to getting entertainment or information in my vehicle. I strongly urge you to reject the NAB's petition 04-160 for the reason that they (XM) are offering a service for their subscribers, one that is unbearable at times sifting through the junk that comprises broadcasting today on AM and FM. We are paying for this service, it is not as though we are stealing signals or hijacking what is still in predominant use via car radios.
